

ELECTRICAL LIFE WHEN APPLYING DC CIRCUIT (Type R14U, R15U)

- Note
- 1 For inductive load, L/R = 1ms or the like is attained if equipped with surge suppressor
 - 2 Electrical life of medium capacity type R24U and R25U when they are applied to DC circuits
 - (1) Derate the load current by 50%
 - (2) Type R24U and R25U cannot be used in any 230VDC circuit and any 115VDC where L/R = 100ms
